April 17, 2019

Hello SPS Participants,

Just wanted to let you know I have received your registration to be part of the 2019 Student Project Showcase (SPS). Therefore, your project should be listed in the google list below.

SPS 2019 (email science@sfsu.edu to have access to this list if you didn't receive this email directly from me/Lannie)

No editing needs to be done until next Thursday, April 25 after the registration is closed.

If you know you should be receiving this email (since you're part of these groups) directly from me and you are not, you need to check you spam box ASAP. If this email is not in your Spam box, send me an email and cc all of your teammates and letting me know to add your email to this list.

The following groups needs to contact me ASAP and let me know who the faculty advisors/professors of these projects are.
Gas-Free Keg (GFK)
Race Quadcopter
Mimicking Robotic Arm

I am expecting to have at least 200 projects so this list will be tripled by next Wednesday. Hence, **emailing to science@sfsu.edu (replying to this email) is the best way to communicate with me**.

When you email to me with any questions/comments/requests, please cc all of your teammate(s) and faculty advisor(s) so everyone will be in the loop and I don't need to address the same questions multiple times.

You also should mark this page as I will upload updated information and email frequently. **http://cose.sfsu.edu/student-project-showcase.** Toward the bottom of this page, you will find a link for previous SPS's. You might want to visit those pages to see how the event will be as the format of this event will be very similar to previous years.

You should be working on the poster and take advantage of the free printing.

T minus 16 days until Showcase!

Best,

Lannie
